

# Table of Contents

<b>Table of Contents .....</b>	<b>i</b>
<b>Advanced ColdFusion: XML, File System and Web Services.....</b>	<b>1</b>
<b>Module 1: Working with &lt;cffile&gt; .....</b>	<b>3</b>
Read and Write Text Files with <cffile> .....	3
Demo: Read Plain Text Documents .....	3
Built-in Function: ExpandPath().....	4
Reading Files with the <cffile> tag.....	5
Demo: Write Text File .....	5
Built-in Function: FileExists() .....	6
Exercise 1: Build a Simple Message Board or Log File .....	7
Challenge .....	9
Possible Solution to Exercise 1 .....	11
<b>Upload Documents with &lt;cffile&gt; .....</b>	<b>13</b>
Using the <cffile> tag for an Upload .....	14
After a <cffile> Upload: FILE Variables .....	15
Demo: Upload Image and Dynamically Create Static HTML Pages .....	16
Deeper Examination: HTML and a File Upload.....	18
Saving long variable values with <cfsavecontent> .....	18
Using the <cffileupload> tag for Multiple Uploads in ColdFusion 9 .....	19
Demo: Using <cfdirectory> .....	21
Using <cfcontent> to create an Excel Spreadsheet .....	22
Exercise 2: Upload External Files and Create Photo Gallery Page.....	23
Challenge .....	27
Possible Solution to Exercise 2 .....	29
<b>Module 2: Using XML .....</b>	<b>31</b>
<b>XML Syntax Basics .....</b>	<b>33</b>
XML Logical Structure .....	33
Each XML document must begin with a language declaration.....	33
Each XML document must have a single root element, which normally contains other child elements .....	34
XML Physical Structure .....	35
Case Sensitivity.....	35
Required Closing Tags.....	35
New Syntax for “empty elements”.....	36
Tags must be nested properly .....	36
Attribute Values must be enclosed properly in single or double quotes .....	36
XML Comments .....	37
XML Logic: Designing Datasheets.....	37
<b>Parsing XML data with ColdFusion .....</b>	<b>39</b>
Demo: Convert an XML datasheet into an XML Document Object with XMLParse() .....	40
Case-sensitive Element Names with XMLParse() .....	42

Demo: Referring to Specific XML nodes .....	43
Method 1 – Array notation with generic node names .....	45
Method 2 – Associative Array notation .....	45
Method 3 – Array notation with specific node names .....	45
Methods 4(+) – Mix and Match .....	45
Demo: Loop through each node with <cfloop> .....	45
Deeper Examination: Counting Nodes .....	46
Manipulating XML data with Built-in Functions .....	47
List of Structure/Array Functions that may be used on an XML Document Object.....	47
List of XML-specific Functions.....	48
Exercise 3: Create a Calendar of Events Built from External XML Files Provided by External Organizations ...	49
Challenge .....	51
A Possible Solution to Exercise 3 .....	53
<b>Manipulating the XML Document Object: Adding Elements .....</b>	<b>55</b>
Demo: Build XML Object in .cfm Document with <cfxml> Tag.....	55
Demo: Query Database to Build XML Document Object .....	56
Demo: Add nodes to Existing XML Document Object .....	58
Deeper Examination .....	59
Deeper Examination: Adding an XML Attribute.....	59
Exercise 4: Add an Event to the Calendar .....	61
Challenge .....	63
A Possible Solution to Exercise 4.....	65
<b>Create a Query Object from Existing XML (optional).....</b>	<b>69</b>
Demo: Combine Multiple XML Document Objects into One .....	69
Deeper Examination: Looping through the XML .....	72
Demo: Convert XML Document Objects into a Query Object with QueryNew().....	73
Deeper Examination: Creating the Query Object .....	76
Deeper Examination: Query the query.....	77
Exercise 5: Co-mingle the Events on the Calendar (optional) .....	79
Challenge .....	81
A Possible Solution to Exercise 5 .....	83
<b>Extensible Stylesheet Language (XSL) Basics .....</b>	<b>87</b>
XSL, XSLT, and XSLFO.....	87
XSL Basics: Linking to an XSL Stylesheet .....	87
Examining an XSL Stylesheet .....	88
The <xsl:stylesheet> tag and the namespace declaration .....	89
The <xsl:template> tag .....	90
The <xsl:value-of> tag.....	90
Referencing iterating nodes .....	90
<b>Server-side XSL Transformation with ColdFusion.....</b>	<b>93</b>
Demo: Transforming XML Data with XSL.....	93
Deeper Examination: XMLTransform() .....	94
Idea! Transforming XML Data into XML Data.....	94
Exercise 6: Transform XML data .....	95
Challenge .....	95
A Possible Solution to Exercise 6 .....	96

<b>XPath Basics .....</b>	<b>97</b>
XPath: the XSL Node Matching Syntax .....	97
Choosing Between Equivalent XPath Expressions .....	97
An XPath testing tool.....	98
<b>Using XPath with ColdFusion.....</b>	<b>101</b>
Demo: Select Nodes Based on Attribute Values.....	101
Deeper Examination: XPath expression .....	102
Deeper Examination: XMLSearch() .....	103
Idea! Convert an XML Document Object to a Query Object .....	103
Exercise 7: Using XPath to select specific XML elements.....	105
Challenge.....	107
A Possible Solution to Exercise 7.....	109
<b>Module 3: Working with &lt;cfhttp&gt; .....</b>	<b>111</b>
<b>Making http requests with &lt;cfhttp&gt; .....</b>	<b>113</b>
Demo: Using <cfhttp> to display a complete page: Screen Scrape .....	114
Demo: Using <cfhttp> to download a complete page and save with <cffile> .....	116
Attributes of <cfhttp> .....	117
Demo: Convert a Text File into a Query with <cfhttp>.....	120
Deeper Examination: <cfhttp> tag.....	123
Deeper Examination: <cfoutput> block.....	123
While looping though the records.....	123
Demo: Add a Column to Query .....	124
Deeper Examination: QueryAddColumn() function.....	126
Idea! Dynamically Creating <i>Static</i> Pages.....	126
Exercise 8: Using <cfhttp> to Access and Parse External Data.....	129
If you are done early.....	131
A Possible Solution to Exercise 8.....	133
<b>Passing Variables with &lt;cfhttp&gt; and &lt;cfhttpparam&gt; .....</b>	<b>135</b>
Creating an Intelligent Agent.....	135
Demo: Examine a Simple Traditional Application .....	136
Demo: Convert Simple Application into an Intelligent Agent.....	137
Deeper Examination: agent.cfm.....	138
Deeper Examination: agent-page2.cfm.....	138
Deeper Examination: <cfsetting> .....	140
Demo: Screen Scraping for Data .....	141
Exercise 9: Simulate the Post Method with <cfhttp> and Create an “Intelligent Agent” .....	143
Challenge .....	145
A Possible Solution to Exercise 9.....	147
<b>Module 4: Working with Web Services .....</b>	<b>149</b>
Examples.....	149
Producers vs. Consumers.....	150
Definitions .....	150
Creating WSDL Documents .....	151
Demo: Converting CFCs into Web Services .....	151

Step 1 – Convert the existing CFC into a Web Service .....	151
Step 2 - Examine a local WSDL file from the demo .....	151
Step 3 - Invoking a ColdFusion Web Service.....	152
Deeper Examination .....	152
Deeper Examination: Passing an argument to a Web Service .....	153
SOAP .....	154
A note about security .....	154
Exercise 10: Convert Existing CFC into Web Service .....	155
Challenge.....	157
A Possible Solution to Exercise 10.....	159
<b>Invoking External Web Services .....</b>	<b>161</b>
Locating Web Services .....	161
Invoking Web Services from .NET, Java and more.....	161
Demo: Random Quote Generator .....	161
Deeper Examination: <cfinvoke> and <cfinvokeargument>.....	162
Exercise 11: Consuming External Web Services.....	163
Challenge.....	164
A Possible Solution to Exercise 11 .....	165
<b>Module 5: Web Distributed Data Exchange (WDDX) (optional) .....</b>	<b>167</b>
<b>WDDX .....</b>	<b>169</b>
Demo: Store simple data as WDDX .....	169
Deeper Examination: <cfwddx> tag .....	171
Demo: Store an Array as WDDX .....	172
Demo: Store a Recordset as WDDX.....	173
Demo: Store binary object as WDDX.....	175
Deeper Examination .....	176
Exercise 12: Serialize data as wddx file.....	179
If you are done early.....	180
A Possible Solution to Exercise 12 .....	181
<b>Deserialize WDDX data in JavaScript.....</b>	<b>183</b>
Demo: Deliver a ColdFusion query to JavaScript.....	183
Deeper Examination: Include JavaScript functions .....	184
Deeper Examination: Deserialize in JavaScript.....	184
Deeper Examination: Generated source code .....	184
Demo: Using the data in a more complicated example.....	186
Deeper Examination .....	188
Exercise 13: Transfer WDDX data from ColdFusion to JavaScript .....	189
If you are done early.....	191
A Possible Solution to Exercise 13 .....	192
<b>Appendix A: Resources .....</b>	<b>195</b>
<b>Appendix B: Set-up Notes .....</b>	<b>197</b>
<b>Appendix C: Selecting Among ColdFusion Code Reuse Methods.....</b>	<b>199</b>

**Appendix D: Dreamweaver, Web Services and Components ..... 201**
